ONC B-9

ELEVATIONS IN FEET

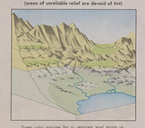
ALL ELEVATION VALUES (AERONAUTICAL, RELIEF AND HYDROGRAPHIC) ARE BASED ON MEAN SEA LEVEL

LEGEND

RELIEF PORTRAYAL

Elevations are in feet. HIGHEST TERRAIN elevation is **10600** feet located at 72°50'N 37°50'W

TERRAIN CHARACTERISTIC TINTS (areas of unreliable relief are devoid of tint)



Green color indicates flat or relatively level terrain regardless of altitude above sea level.

CONTOURS

Basic interval 1000 feet.

Dashed contours indicate approximate relief

SPOT ELEVATIONS

Accurate Elevations.....8000
(Maximum possible error is within 100 feet)
Approximate Elevations.....8000
(Maximum possible vertical error is 1300 feet)
Location Undetermined.....8000
(Vertical accuracy unknown)
Ice Elevations.....8000
Lake and Ocean elevation.....8000

CULTURE

Landmark feature
Lighthouse(s).....

ATTENTION

THIS CHART CONTAINS MAXIMUM ELEVATION FIGURES (MEF)

The Maximum Elevation Figures shown in quadrangles bounded by ticked lines of latitude and longitude are represented in THOUSANDS and HUNDREDS of feet above mean sea level. The MEF is the highest known elevation in each quadrangle, including terrain and obstructions, (trees, towers, antennas, etc.), in areas of extensive coverage except the MEF is shown by a dot's symbol across the area.

Example: 12,500 feet..... 12[5]

AERONAUTICAL INFORMATION

AERODROMES

Major..... 1000 100

Major, runway pattern not available..... TOWALUS 1000

Major aerodromes surmarked have a hard surface runway length of 3000 feet or more. Runway patterns and 6000 feet diameter circle is shown at 1:500,000 scale. When runway pattern is not shown, the number following the aerodrome is the length of the longest runway to the nearest hundred feet.

Minor.....

VERTICAL OBSTRUCTIONS

Single..... 1478 (1478) Multiple..... 1478 (1478)

Highest vertical obstruction within ticked lines of latitude and longitude..... 1478 (1478)

Vertical obstructions with landmark significance..... 1478 (1478)

1478 – Height of top above mean sea level (MSL)
(1478) – Height of top above ground level (AGL)

No obstructions 200 feet or more above ground level are known to exist in this area.

RADIO FACILITIES

- VHF OMNI RANGE (VOR)
- VORTAC
- TACAN
- VOR DME
- Other Facilities

SPECIAL USE AIRSPACE

R-4
PROHIBITED AREAS

A-4
ALERT, CAUTION, DANGER RESTRICTED OR WARNING AREAS

NUMBERS INDICATE INTERNATIONALLY RECOGNIZED NUMERICAL IDENTIFICATION

Civil users may purchase DMAAC products by ordering them from the following address:
Distribution Division (C-44)
National Ocean Survey
Riverdale, MD. 20840

RELIEF DATA INCOMPLETE

MAXIMUM ELEVATION FIGURES ARE BELIEVED NOT TO EXCEED 12200 FEET

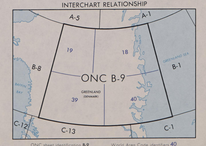
INTERCHART RELATIONSHIP



ONC sheet identification: B-9 World Area Code identifiers: 40

World Area Code identifiers are also carried in the body of the chart by corner ticks and numbers.

CAUTION

AIR INFORMATION CURRENT THROUGH 3 JANUARY 1978

Consult NOTAMS and Flight Information Publications for the latest air information; the DMA Aeronautical Chart Updating Manual or MCRO 8260.1 for the latest Chart Change Information; and for other chart revision information.

LINES OF EQUAL MAGNETIC VARIATION FOR 1975 (Annual Rate of Change-No Change).

USERS SHOULD REPORT CORRECTIONS, ADDITIONS AND COMMENTS FOR IMPROVING THIS PRODUCT TO:

U.S. Users: Director, Defense Mapping Agency Aerospace Center St. Louis AFS, Missouri 63118, ATTN: PF.

U.K. Users: Directorate of Military Survey, Ministry of Defence, London.

WORLD GEOGRAPHIC REFERENCE SYSTEM (WGRS)

GRIDDED AREA — REFERENCE TO WITHIN ONE MINUTE

EXAMPLE (Degree Interval)

Read 1000NE' values from left to right and from bottom to top.

1. Read letters identifying basic 10° quadrangle in which the point is.
2. Read letters identifying 1° quadrangle in which the point is.
3. Locate first MINUTE (tick of VERGENCE to LEFT of point and determine 1000NE' value.
4. Locate first MINUTE tick of LATITUDE BELOW point and determine 1000NE' value.
